

Amzur VPN Usage Policy

Purpose

This policy defines the secure use of VPN access for remote employees and contractors.

Authorized Access

VPN access is granted only to approved users with valid business requirements.

Authentication

Users must use MFA-enabled credentials while connecting to the corporate VPN.

Acceptable Use

VPN access must only be used for authorized company activities.

Security Requirements

Devices connecting to VPN must have updated antivirus, firewall, and security patches.

Monitoring

VPN activities may be monitored for security and compliance purposes.

Violation

Unauthorized use may result in disciplinary action and access revocation.
